PIM DATATYPES

- Contacts
- Calendar
- Tasks/To-Do's
- Email¹
- Notes² / Memo pad²

XTNDConnect PC is a software application that makes data synchronization easy, allowing you to synchronize your contacts, calendar, tasks, email, and notes between your mobile devices and popular PC applications. XTNDConnect PC greatly improves your effectiveness and productivity without requiring the involvement of IT departments.

Available in 17 languages and validated in the market with more than 50 million copies distributed, XTNDConnect PC is fast, flexible, and easy to use. The product is available directly for customers and is also customized for OEM/ODM implementations.

ONE SOLUTION THAT WORKS WITH MAJOR DEVICES AND APPLICATIONS

Now, corporations and individual users only need to purchase one synchronization application to support Windows-powered devices such as Windows Mobile 6 & 5.0, Pocket PC, Pocket PC Phone Edition and Microsoft Smartphone devices. Most Palm, Sony Ericsson, Nokia, and NEC phone models are also supported. With XTNDConnect PC, selecting devices is as easy as selecting a printer. Synchronize your devices with Microsoft Outlook, Microsoft Outlook Express, Lotus Notes, Novell GroupWise, Lotus Organizer, and newly added support for Windows Vista and Google.

FLEXIBILITY FOR YOUR CHANGING ENVIRONMENT

XTNDConnect PC has built-in flexibility that allows you to synchronize in a variety of ways. Any number of devices can be associated with multiple applications. You can synchronize multiple mobile devices to a single PC application and synchronize a single mobile device to multiple computers. You can also transfer data from one PC application to another and keep two applications in sync. The flexibility of XTNDConnect PC makes it the solution for every environment.

EASY TO USE

The set-up and configuration is simplified through XTNDConnect PC's dynamic detection of most devices. After a quick installation, simply clicking on an icon enables you to synchronize or adjust your settings. The product's auto detection feature enables you to synchronize automatically when you connect your mobile device to your PC and a scheduled synchronization feature keeps your device synchronized as long as it is connected.

FAST SYNCHRONIZATION

XTNDConnect PC uses Rapid Transfer Technology™ to provide fast synchronization. After the initial sync, XTNDConnect PC synchronizes only your changes, so you save time.

EXTENSIVE LANGUAGE SUPPORT

English, Chinese (Simplified and Traditional), Danish, Dutch, Finnish, French, German, Italian, Japanese, Korean, Norwegian, Polish, Portuguese, Portuguese (Brazilian), Spanish, and Swedish versions of XTNDConnect PC are available.
